

	A	B	C	D	E	F	G
4							
5							
6	Measure	Value	Interpretation				
7	Deterministic nominal capital	46,078,527.76	Expected wealth under model assumptions.				
8	Deterministic real capital	10,661,532.19	Inflation-adjusted; not the simulated median.				
9	Simulated median real capital	9,465,248.19	Central result among 1,000 hypothetical paths.				
10	Real capital 10th percentile	5,498,009.97	Lower-tail marker, not a guarantee.				
11	Real capital 90th percentile	17,233,260.20	Upper-tail marker.				
12	Target probability	31.00%	Conditional on chosen model and assumptions.				
13	Probability standard error	1.46%	Sampling error only; excludes model uncertainty.				
14	First 500 target probability	33.60%	Batch diagnostic; comparison with full run.				
15	Second 500 target probability	28.40%	Independent stream segment; no calibration claim.
